

## GREENS WILL CLOSE THE MINING INDUSTRY

The Greens will replace all power with wind and solar energy which has failed everywhere in the world: California, Spain, Italy and Australia. The Australian Energy Management Operator [AMEO], which rates all energy providers in terms of how much energy they can provide to the grid, will only certify any wind farm at 10% of its capacity. Solar is no better. Don't let the Greens switch off your lights. **VOTE THE CLIMATE SCEPTICS**
